INDIGENOUS MENTAL HEALTH AND WELLBEING IN TRANSITION.

Yury Sumarokov, MD, PhD

Northern State Medical University, Arkhangelsk
Indigenous populations

One of the most studied population groups

Indigenous groups are very different around the world

Many of the groups have high suicidality

Culture, religion, understanding and beliefs are different

Resources, health care, recognition of the phenomena as an official duty is different
Health and social disparity of indigenous people

1. Suicidal rate up to 6X higher
2. Youth incarceration up to 53X higher
3. Homelessness approx. 14X higher
4. Unemployment approx. 5X higher
5. Life expectancy approx. 10 yrs less

http://www.australianstogether.org.au/about
High suicide rates in the indigenous populations were reported from:

- Indigenous Canadians from the Hudson Bay and the Northwestern Territories
- Sami from Norway and Sweden
- Australian aborigens
- Native Americans in the United States
- Maoris in New Zealand
- Inuits in Greenland
- Brazilian indigenous people
- Fijians
Arctic indigenous peoples

- Around 10% of total population living in the Arctic
- Over 40 different ethnic groups
Colonization of Russian Arctic

- Active population of the Arctic by Russians started in XV century
- First Arctic cities: Pustozersk (1499), Mangazeya (1572)
- Introduction of taxes for the aborigines ("yasak") – in XV century.
- Colonization of Northern Siberia and Chukotka – since XVII century
- Military conflicts in the Arctic (Pustozersk (1644 – end of XVIII cent., Yugra (1483 - 1500)
- Christianization (completed in XIX century)
- Trade colonization (XIX – beginning of XX century)
- Soviet time (1918 – 1991) – collectivization, forced settlement, boarding schools, destruction of traditional life-style
- Post-soviet transition – expansion of national and trans-national mining companies
Elements of social and cultural transition

- Language assimilation
- Psychological changes
- Sociological changes
- Cultural changes
- Economical changes
- Employment/unemployment
Health effects of colonization

• Effects on mental health:
  - psychological distress,
  - depression,
  - addictive behavior,
  - suicide.
• Effects on physical health:
  - obesity,
  - diabetes,
  - cardio-vascular diseases
• Effects on health services:
  - health inequities,
  - loss of traditional practices.
### Suicide Rates in the Arctic States (WHO, 2015)

Area of Studies
Suicide rates per 100,000 person years

Among Nenets: 79.8
Highest (391) among 20-29 years of age

Among non-indigenous: 49.2
Highest (106) among 30-39 years of age
AGE AND SEX DISTRIBUTION OF SUICIDES (NAO, RUSSIA)
Alcohol and suicide in the Nenets Autonomous Okrug and Arkhangelsk Oblast, Russia

Yury A. Sumarokov¹,²*, Tormod Brenn¹, Alexander V. Kudryavtsev¹,², Oleg Sidorenkov¹ and Odd Nilssen¹

Among Nenets:

- 78.3 %
- 92.3 %

NAO

- 2.02 %
- 2.54 %

- 2.14 %
- 2.56 %

- 74.1 %
- 59.3 %

- 82.9 %
- 46.6 %

Yury Sumarokov, 16.11.2017
“This has been a crisis for 40 years...and yet we still don’t have accurate suicide data”

Natan Obed, Inuit Leader (Lancet, 18 June, 2016)
## Risk and protective factors for indigenous suicide

<table>
<thead>
<tr>

Short history of alcohol in the Russian Arctic

• XVII century– strong alcohol was introduced in Russia

• XVIII-XIX – slow growth of vodka consumption

• 1895 – state monopoly on production and sales
Short history of alcohol in the Russian Arctic

- End of XIX century - Beer and vodka production in Arkhangelsk
- Introduction of alcohol in the Arctic communities by Russian and other merchants
First anti-alcohol intervention

- 1900 – 1918, Kolguev
Present situation

• 1985 – Anti-alcohol Legislation by M. Gorbachev
• 7/06/1992 – President B. Yeltsin abolished state monopoly on production and sale of strong drinks, the price of vodka dropped dramatically

• 2000 – Anti-bier campaign (G. Onischenko)

• 2005 – Two anti-alcohol laws (# 102 and # 209 - On state regulation of alcohol sales)
  Results: Accidental alcohol poisoning rate in Russia dropped down in 38.2 % in 2006-2007
  Alcohol psychoses - dropped down in 22% in 2006-2007

• Since 2011 – Time sales regulation
Average accidental alcohol poisoning mortality rates in 2000-2014 (per 100,000)

Alcohol poisoning rate in Russia dropped down in **38.2 %** in 2006-2007

Alcohol psychosis - dropped down in **22%** in 2006-2007

Source: Rosstat, Photoexpress
Consumption of alcohol drinks (in liters per capita) in the Nenets AO 2000-2012
Prevention activities

- Local activities: courses, seminars in suicide prevention for school teachers and psychologists
- NGO “Community Health Partnership” activities in Nenets, Yakutia and Chukotka (teachers training in prevention of substance abuse and suicides among the young people, training the health mediators)
- Regional and Federal Alcohol laws
- Red Cross activities (Chukotka)
- Crisis hot lines
Alcohol sales restriction policies

- Murmansk oblast 23.00 – 8.00 (strong drinks 21.00 – 11.00)
- Arkhangelsk oblast 21.00 – 10.00
- Nenets AO 20.00 – 11.00 (strong drinks) 23.00 – 8.00 (beer)
- Yamal 22.00 – 10.00
- Taymyr 23.00 – 8.00
- Yakutia (Sakha) 20.00 – 14.00 (strong drinks), total restrictions - in 3 municipalities,
- Chukotka total restrictions 1 municipality
  working days restrictions – in 5 municipalities
