Appendix 3
Technology review of urine diversion components
Worldwide listing of suppliers for urine diversion pedestals/seats
(for UDDTs or for UD flush toilets)
Important note:

The tables of suppliers provided here are not complete listings but give only an indication of available products. If you spot errors or omissions, please contact us at ecosan@giz.de. All information is provided to the best of our knowledge. In the brackets below each listing the date for provision of the information/last update of information is given. Please be aware that not all information is from 2011. An entry in this list does not imply a recommendation by GIZ. Costs are indicative only.

Additional photos are available in our photo collection on the internet (look for the sets on UDDTs, or use keywords “urine diversion”, UDDT, pedestal):
http://www.flickr.com/photos/gtzecosan/collections

List of Tables:

Table 1. Suppliers of urine diversion pedestals for urine diversion dehydration toilets, for sitting toilets (in alphabetical order by country)........................................................................................................................ 4

Table 2. Suppliers of urine diversion flush toilets, sitting type (in alphabetical order by country)................................. 10
Table 1. Suppliers of urine diversion pedestals for urine diversion dehydration toilets, for sitting toilets (in alphabetical order by country).

**EcoFlush**
- **Material:** Sanitary porcelain
- **Flush volumes:** Urine 0.1-0.3 L, faeces 2.5 L (faeces flushed by gravity).
- **Indicative cost:** EUR 464
- **Units sold:** 8,000
- **Countries sold in:** 20 (main countries are Denmark, Finland and Norway)

**EcoVac**
- **Flush volumes:** Urine 0.1 L, faeces 0.7 L.
- **Indicative cost:** EUR 1,580 (including vacuum unit and electronic box)
- **Units sold:** 400
- **Countries sold in:** Same as above

---

**Additional notes:**

1. About **Gustavsberg toilet** (by Wolfgang Berger 6 May 2009, Ecosanres discussion forum):
   - The 1/2" urine pipe, which is about 50 cm long and is designed as a trap, needs to be cleaned by some water pressure to remove slimy residues, which may grow by urine-water mixture and may block the urine flush. To prevent blockage of the pipe system, I recommend to use a dilution of lemon acid or vinegar (no concentrate) to reduce crystalline deposit. We use it for the cleaning of dry toilets and dry urinals as well and it is easy to apply by a spray bottle. Its low pH acts as a disinfectant. In case there is some blockage, the urine pipe is easy to remove, because the installations are outside the bowl. To avoid blockage by tissue paper, we deliver a sieve, also made from stainless steel.

---

7 Same model name is used for vacuum toilet without urine diversion.
